April 2018

This letter is provided as a recommendation for White Sands Construction, Inc. They recently completed a project to renovate the men's and women's locker rooms at the Alamogordo Family Recreation Center.

White Sands Construction, Inc. successfully finished the project on-time. Their staff are conscientious and professional. They kept the city regularly updated of progress and issues. As issues came up, they were proactive and provided suggested solutions.

The city is pleased with the final outcome of this project. We would be happy to work with them again on other city projects.
