To whom it may concern:

I am the lead Orthodontist in a partnership with Alamogordo Orthodontics LLC, I recently had the pleasure of working with White Sands Construction, Inc., as they built our new practice in Alamogordo, NM.

I have worked with many construction companies while in my position over last 15 years. None of them have measured up to the quality control that I witnessed with White Sands Construction, Inc. Project Manager; Catlin Curry took the time to listen to my concerns throughout the build out, and was always available during this process. Also, the Site Supervisor, Steve Malett, made sure that the quality of work was outstanding. I look forward to working with them again soon.

Please feel free to contact me or my Office Manager with any additional questions.

Thank you,
