RE: Letter of Recommendation
White Sands Construction, Inc.

To Whom It May Concern:

I had the pleasure of working with White Sands Construction, Inc. on the NMSU Native American Center on campus in Las Cruces, New Mexico. Based upon this experience, I strongly recommend them for consideration as the general construction contractor on your project.

The NMSU Native American Center was challenging from the beginning. Project Manager Levi WillimSon and Superintendent Steve Malett kept the lines of communication open throughout the project and had a good working relationship with all the parties concerned. All issues were dealt with in a timely manner and regular meetings were held to work out details before issues became problems.

As a LEED (Leadership in Energy and Environmental Design) Project, there were many extra considerations that had to be dealt with to comply with the U.S. Green Building Council. All materials had to be accounted for and recycled, and all materials had to have positive documentation and proof of recycling. The Native American Center was a successful LEED Project.

We are happy with the way the building turned out and that White Sands Construction, Inc. achieved a project that was on time and on budget.

In my experience, White Sands Construction, Inc. is very cooperative and dedicated to doing what is necessary to complete their projects on time and within the budget. The company and its personnel are professional, understanding and innovative, and I look forward to working with this highly qualified contractor in the future.

Sincerely,
WHPacific, Inc.
