RE: Health Sciences Addition to Reidinger Center
NMSU-Alamogordo

To Whom It May Concern,

Recently, White Sands Construction was General Contractor for the subject project. The building is a three story, 16,000 square foot facility containing laboratories, classrooms, and offices.

White Sands Construction performed admirably, overcoming a constrained site and short construction schedule to produce a quality building. Additionally, since we were pursuing LEED Silver Certification, they embraced the process and even earned extra points for exemplary performance in some categories. The building achieved Gold Certification.

In short, this office looks forward to working with White Sands Construction on future projects.

Sincerely,

Gary B. Williams, AIA
