To whom it may concern,

It is my sincerest pleasure to recommend White Sands Construction for any type of construction needs that are available with the company. White Sands Construction completed some renovation of stucco, trim, fascia boards, and paint here at the Ruidoso Community Center. The team did an outstanding job with the project. Many were on site day to day to accurately complete the project in a very timely manner. White Sands Construction had foreman monitoring the work and was available to talk whenever a concern arose which was then handled very quickly. I believe you will find White Sands Construction to be competitively priced while giving the customer excellent service. Their services are quite professional while giving the customer quality work. The project was completed and came out much better than anticipated.

I highly recommend White Sands Construction's services to any client and I suggest that you consider utilizing this excellent business for your future projects. Please feel free to contact me at (575)257-4565 or AnthonyMontes@ruidoso-nm.gov for any questions or further information regarding White Sands Construction.

Sincerely,

Anthony Montes

Community Center Manager
