To Whom It May Concern:

I am writing this letter of recommendation to endorse White Sands Construction for potential project work.

I served as the Fire Chief of the Ruidoso Fire Department for 25 years. During my tenure there, I have used White Sands Construction on several occasions. The First occasion was the construction of our new main fire station a 4.1-million-dollar project. This particular project won numerous state awards. The next project was on a historical station we had and wanted to tear it down and rebuild. White Sands designed a way to leave existing building, remodel the whole outside and lift the station with helical piers to make it safe to occupy, and still came in under budget for a replacement of the entire building. The final project, my favorite one is the remodel of the Upper Canyon Fire Station # 3. White Sands turned a old dilapidated station from old to new and our entire department was thrilled. Not only do we have a nice new station that we are proud of, moral went through the roof with this project. They truly exceeded our expectations on this one. I'm very thankful to have met Catlin Curry and would definitely hire this company again.

The entire crew was professional as well as hard working. They were in the public view every day and the perception of the public was positive.

Based on my experiences with this company I would defiantly hire them again. They made my job extremely easy as well as receiving accolades from the City Manager, Mayor and Council

If you need any additional information, please contact me at the information below.

Sincerely,
Harlan Vincent
(Ret)Chief, Ruidoso Fire Department
