

June 5, 2012

To Whom It May Concern:

SMPC architects worked with White Sands Construction on the New Mexico Tech, Macey Hall renovation project during 2011 and 2012. SMPC had observation responsibilities over the architectural portions of the project and found White Sands Construction to be easy to work with and very professional in their project management and the quality of their work.

SMPC Architects has had previous experiences with White Sands Construction and have always found them to be of the highest professional level.

Please feel free to contact SMPC at 505-255-8668 with any questions.

Sincerely,
