

# SMPCArchitects

PRINCIPLES OF DESIGN.

March 5, 2013

To Whom It May Concern:

SMPC Architects worked with White Sands Construction on the new Desert Sun Toyota building in Alamogordo, NM from 2011 to 2012. The project was very successful and completed on schedule. We worked together via email, telephone, FTP site, PASKR and monthly onsite project meetings. We found White Sands Construction to be very organized and great to work with. They were very professional in their project management and the quality of their work. They exhibited great work ethics from the field superintendent to the project manager.

SMPC Architects has had previous experiences with White Sands Construction and have always found them to be of the highest professional level.

Please feel free to contact SMPC at 505-255-8668 with any questions.

Sincerely,

Patricia Hancock, AIA LEEP AP BD & C  
Principal
