Re: Vinyl Fence Installation at Alta Vista

To Whom It May Concern:

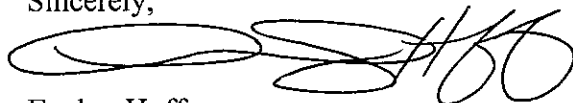

Please let this letter serve as a letter of recommendation for White Sands Construction Inc. The recommendation comes from the excellent service and product of work the Housing Authority received during the vinyl fence installation project at Alta Vista.

The Housing Authority received great service from all employees of White Sands Construction. The project manager and office support staff provided the Housing Authority staff with concise and organized documents in a timely manner. As a federally funded program, correct documentation is imperative to maintaining funding. The on site personnel did a great job of quality control and a wonderful job of managing difficult subcontractors. The PASKR system made submittals and correspondence effortless as well as organized. I cannot say enough about White Sands Construction's customer service.

The Housing Authority was very pleased with the quality of work provided by White Sands Construction. Everything was done in a clean and timely manner. Punch lists were small and dealt with quickly. The on site personnel and project manager made good suggestions that increased the workability of the project. All problems were dealt with in a professional manner even when staff was provoked in an unacceptable way.

There are several unique characteristics that make projects at the Housing Authority difficult. Whether it was dealing with tenants or navigating old and inaccurate plans, White Sands Construction conducted themselves with professionalism and character. I would recommend them for any size job with any set of regulations. Please contact me if you need any other information.

Sincerely,

Evelyn Huff  
Property Management Coordinator  
Housing Authority of the City of Alamogordo
