Re: White Sands Construction

To whom it may concern,

White Sands Construction recently completed an Urgent Care Center designed by this Firm. The building is a total of 7,400 square feet, with 4,000 square feet of clinic and 3,400 square feet of offices.

White Sands performed admirably, completing construction within a very constrained schedule. They followed our documents well, and were very good at resolving minor issues which inevitably arise in projects. They delivered a quality project on schedule and within budget.

I can recommend this contractor without hesitation.

Sincerely,

Gary D. Williams, AIA
