Alamogordo, NM 88310

RE: Letter of Recommendation
Chaparral Family Medical Center

This Project was somewhat unique in that two different Contractors were involved, one to provide the pre-fabricated building and the other, White Sands Construction to provide the foundations and all site improvements and infrastructure. Due to the efforts of White Sands personnel John Balin, Superintendent and Levi Williamson, Project Manager, the site improvement portion of the Project went well and on schedule.

It has been my pleasure working with White Sands Construction on a new health clinic for Otero County.

I have no hesitation in recommending White Sands in performing work on our future projects.

I can be reached at our Las Cruces office, my email at harald@asa-architects.com.
