Dear Mr. Crimmins

I want to thank you and your construction crew for the outstanding service you provided Holloman AFB while installing generator power to one of our key facilities. Modifying existing electrical circuits, installing the generator, associated fuel tank, and transfer switch were essential upgrades to building 317. This additional capability will help increase our Fighter Wing's readiness to produce sorties in any possible future conflicts. Your company's quick reactions and flexibility throughout this project were noticed and appreciated.

I look forward to working with your company in the future and again want to thank you for your outstanding service to Holloman AFB.

Sincerely

THANK YOU

JUAN IBANEZ, JR., Lt Col, USAF
